Good afternoon Residents of Fraternity/Sorority University-operated chapter homes, Presidents, and Advisors,

We are looking forward to welcoming you back to Penn’s campus beginning on your approved arrival date, either Standard Move-In or approved Early Move-In. Early move-in submissions are no longer being accepted. Standard Move-in begins on August 27, 2021 at 9:00 am. Information about key sign-outs, parking, and additional living guidelines will be communicated soon. Our office is also awaiting final guidelines for Event Registration to share with you.

**COVID-19 Related Information**

**Masks:** Note that the University recently announced that all members of the Penn community and visitors are required to wear masks while indoors in public or shared spaces.

**Guest(s):** Review Penn’s Visitor Guidelines. Residents can have a guest assisting with move-in but are asked to limit guests to no more than two. During approved Early Move-in before August 27: any guest must leave the home promptly after finishing move-in and staying overnight in the chapter home is not permitted.

**Gateway Testing:** To help protect our fellow Quakers and those in our surrounding communities, and to keep our return to in-person activity on campus as safe as possible, all students will be required to undergo Gateway Testing upon arrival to campus, regardless of vaccination status, in addition to a campus-wide screening test in late September. This will help Penn to further benchmark positivity rates on campus.

Students do not need to quarantine upon arrival to campus. However, in the event of a positive Gateway Test, students will be required to isolate for 10 days and cooperate with our contact tracing efforts, even if fully vaccinated.

All students should schedule their COVID-19 Gateway Test online within 24 hours of arrival on campus. This test must be completed through our own Penn Cares testing system in order to be compliant with our Gateway Testing requirement and will only be provided at the Tent near Du Bois College House (3900 Walnut).

If you haven’t done so already, please be sure to upload your COVID-19 vaccination information, and all other required immunization records and health insurance requirements, to your Student Health Service portal.

- Upload instructions for existing students
- Upload instructions for new students
- Enroll or waive: health insurance information
As a reminder, the following public health measures remain our primary tools to minimize COVID-19 transmission:

- Get fully vaccinated before you arrive to campus
- Participate in required Gateway Testing upon arrival to campus
- Participate in Penn Cares screening testing twice weekly until fully vaccinated or if you have an approved medical or religious exemption
- Mask-up when required and desired
- Wash hands frequently and stay home when feeling sick.
- Use PennOpen Pass to assess symptoms of and exposure to COVID-19. PennOpen Pass provides the most updated clinical and public health guidance to reduce the risk of spread within the Penn community.

Visit coronavirus.upenn.edu and follow @COVIDPenn on social media for up-to-date information.

Please be sure to stay up to date with checking your email should any additional information be made available electronically pertaining to your move-in.

Thank you,
OFSL Team and Campus Health
